

高压熔断器

## ■ 用途 Applications

RW10-35 型户外高压限流熔断器用于电压互感器的保护，电力线路的过载和短路保护。  
RW10-35/0.5 型 0.6-1.8A 范围内，1 分钟熔断。2-7.5A 1 小时内熔断电流暂不规定。10A 时，其电流为额定电流 2 倍时 1 小时内熔断。

RW10-35 type outdoor H.V Current-limiting fuse is used for protecting for voltage transformer, protecting from overload and short circuit for power circuit.

RW10-35/0.5 type melts in 1min within 0.6-1.8A. Within 2-7.5A for 1 hour, the fusing current has not regulated temporarily. For 10A, while its current is 2 times of rated current, it melts in 1 hour.

## ■ 型号含义 Model And Implication
